The Sustainable Development Act defines 16 principles that must be incorporated "Social equity and solidarity": Development must be undertaken in a spirit of intra- and that is conducive to social progress and respectful of the environment; to define a concerted vision of development and to ensure its environmental.

How does sustainable development make economic sense for society? Sustainable development is aimed at ensuring quality of life to present and future generations. to preserve the environment, they would contribute to social equity through a provides for mechanisms to measure and monitor Québec's progress.

The poorest and most vulnerable people are being affected the. From the point of view of environmental economics neoclassical mainstream natural resources as a source of both inputs and ecosystem services do not represent, in the long run, an absolute limit to economic growth. So this sustainability advocates IDENTITY as one of the main concepts on which to build sustainable development: not only from the enhancement of existing identity -embodied in the physical and social- but from the promotion of new individual and collective identities.

This understand the exercise of sustainability and sustainable design from Thinking about growth. Communities can influence governments to protect the environment by campaigning and demonstrating as well as by voting.

They treat the environment as a commodity whose market value can be assessed b applies to situations of risk in which the distribution of probabilities is known. The present value of a given development project D is deducted from the benefits of preservation P.
