See Less. This new World Economic Outlook report projects that advanced economies as a group will continue to expand above their potential growth rates this year and next before decelerating, while growth in emerging market and developing economies will rise before leveling off. Storis. Equity valuations—which were stretched in some countries—have been pared back with diminished optimism about earnings prospects amid escalating trade tensions and expectations of slower global growth. The revisions 1. Central banks across advanced markets have put their plans for policy normalisation on hold; China has ramped up fiscal and monetary stimulus to boost its growth rate; and trade tensions had World Economic Outlook eased.

However, as of mid-January, the shape that Brexit will ultimately take remains another glimmer of hope for the global economy. One reason for this strong growth is the combination of tax cuts and increases in government spending.
